Project Alert Service

Powerful and dynamic, essential to help your business

The complete tailored solution for your business – Flexible construction leads searches, simple lead tracking and shared notes, mail merge, fully integrated CRM options. **Evolution** is a tailored construction lead management solution which has been developed for Building Register Limited.

After data selection, smooth lead delivery through **Evolution** is the key. It offers a number of highly innovative features including; flexible service creation, client administration and licence controls, interactive feedback, list tracking and project watches.

Clients can log in to **Evolution** anytime via our homepage at www.buildingregister.com.

Whether you are a small business or large corporation, **Evolution** is the service for you.

Project Example

Project leads – Tailor your data selection around projects and you'll receive information on relevant construction developments within 24 hours of our research team picking up the lead.

Company Example

Companies & people leads – Take a look at our project data from a company perspective and we can give you a complete picture of activities we know they are involved with through our 'Working With' function.

Here at Building Register, we provide a range of data based construction intelligence products and services. Our team of experts create and shape all of our products to ensure our customers receive the tailored service they deserve.

We've spent years building our extensive database which has evolved by us tracking 100% of all planning applications.

Although our core business is supplying leads to the construction industry, we recognise that support and delivery are equally integral. By investing heavily in product development over the past few years, we now have an excellent portfolio of construction products and services...
